Introduction to PatientTrak February 2023 Release

Release No. 20230228.1

This release includes enhancements and fixes to the PatientTrak application. Complete information and procedures for implementing the enhancements are included in the applicable sections of this document.

The latest version of Google's Chrome browser is recommended.

Contents

Fixes

- o   Fixed an issue with IntakeQ removing questionnaires for other organizations.
- o   Fixed an issue with the Azure API passthrough log.
- o   Fixed an issue that was causing PatientTrak Forms to not filter when using a scheduled campaign.
- o   Fixed an issue that was causing the PatientTrak Intake Kiosk to flicker.
- o   Fixed an issue where Scheduled Texting Campaigns would not show when navigating to the page.
- o   Fixed an issue that was causing IntakeQ to not send remaining reminders after an individual failure.
- o   Fixed an issue where IntakeQ was only refreshing the first Practice Questionnaire.
- o   Fixed a U.I. issue where the Intake Kiosk status was showing at all times.

Enhancements

- o   Implemented a new recording process of auditing Note, Activity and Area fields.
- o   Implemented a new recording process for when a user adds, edits, or deletes a user.
- o   On the PatientTrak Intake Kiosk, the First and Last name question will now be the first instead of the last question.
